

## Witchcraft 5600/6000 DDR5 Gaming Dram

### Product Description:

Witchcraft (WC) series memory modules use effectively tested original chips and have undergone rigorous screening and testing to demonstrate excellent compatibility and stability. The ECC function is added to the memory particles to correct the internal components of the memory particles. Errors generated when accessing data provide a more stable and reliable environment for computers. Each memory module has 5600-6000 MT/s, which can greatly improve system operation efficiency. It supports Intel XMP 3.0. Beginners who are interested in overclocking can directly select the desired XMP overclocking speed setting in the BIOS to complete automatic overclocking. The operation is convenient and the system can remain stable.

### Witchcraft (WC) series product Information:

Memory type	DDR5
Physical dimension	U-DIMM
Capacity	32 GB (2*16GB)
Speed	XMP5600 / XMP6000
CL value	40-40-40 / 40-40-40
Operating Voltage	1.2V / 1.3V
Operating temperature	0°C - 85°C

Packaging	Product photo	Type	Part No.	Capacity	Specification	MOQ	EAN Code
Dual pack		DDR5	DWC5U560032G/D	32GB / 2x16GB	5600MHz 40-40-40 (1.2v)	10	4711510220425
		DDR5	DWC5U600032G/D	32GB / 2x16GB	6000MHz 40-40-40 (1.3v)	10	4711510220081
